Hi Ed,

I wanted to let you know that we've posted the aggregate amount of all company's high-three average production and consumption amounts on our website. See step 12 at <https://www.epa.gov/climate-hfcs-reduction/allowance-allocation-methodology-2022#general>. I'm including them here for convenience:

- Sum of the "average high year" production values determined under 40 CFR 84.9(a)(1) of all eligible entities: **357,838,394 MTEVe**
- Sum of the "average high year" consumption values determined under 40 CFR 84.11(a)(1) of all eligible entities: **383,412,342 MTEVe**

Have a great weekend!

Best,
Luke

Hi Ed,

Thanks for reaching out and apologies for the delay. As we noted when we talked last, we have to run a process since the data was collected through the GHG Reporting Program, and they have very

specific requirements regarding release of data—even if aggregated. We've sent out the note to affected reporting entities and will continue to follow the process on release. Once that process is complete, we intend to make the number available.

Best,
Luke

Subject: Followup from IGAS call

Hi Luke,

Thanks again for running through the allocation rule. I hope you are well. I wanted to follow up to see if we can get the aggregate number we discussed.

Thanks much,
Ed
